EVENTS DURING THE QUARTER

Essity divests partly owned company in Tunisia

On October 21, 2020, Essity announced that the company is divesting its 49% stake in Sancella Tunisia to the other owner Sotupa. Sancella Tunisia offers a range of Essity's products and brands in Tunisia, Algeria, Morocco, and Libya. Essity will retain a presence on these markets through license and distribution agreements.

In 2019, Sancella Tunisia reported net sales of SEK 575m. The divestment was completed in December 2020 and gave rise to a gain of SEK 29m, which is recognized as an item affecting comparability in Q4 2020.

Essity raises target for adjusted return on capital employed to above 17% by 2025

On October 22, 2020, Essity announced that the company is raising its target for adjusted return on capital employed to above 17% by 2025. The previous target of above 15% for adjusted return on capital employed has been achieved during the last 12 months. The raised target will be achieved through the continued execution of Essity's existing strategy, an accelerated digital transformation and further streamlining of production, logistics and distribution. Other financial targets remain unchanged.

Essity's innovation-driven category and channel strategy with leading brands combined with comprehensive efficiency improvements have contributed during the past three years to good organic sales growth and a gradual increase in profitability. Structural profitability in Consumer Tissue has been raised for example as a consequence of a higher share of own brands, a focus on growth in segments with high margins, successful innovations and more efficient production. In Baby Care, work is continuing to improve profitability and during the year we have, for example, exited underperforming positions in North Africa and Russia. In Incontinence Products, Medical Solutions and Feminine Care the focus remains on growth. In Professional Hygiene, an increased awareness of the importance of hygiene and health is eventually expected to result in rising demand.

Essity's digital transformation will accelerate in the years ahead through a new digital platform. This will further strengthen the Group's customer and consumer offerings, generate significant cost savings and reduce the need for working capital. This digital investment is expected to amount to approximately SEK 2.6bn. Of this amount, approximately SEK 1.4bn will comprise costs that will be charged to the 2020-2024 period, and SEK 1.2bn will comprise capital expenditures. A positive sales and earnings impact is expected gradually from 2022. In the short term, costs are expected to be offset by savings in other areas. The digital platform will enable automation in all parts of the value chain, simplification and economies of scale, and greater visibility and predictability based on high-quality data collection and advanced analytics.

The new Manufacturing Roadmap program will optimize and streamline all of Essity's approximately 60 wholly-owned facilities for world-class cost efficiency, quality and service levels. The program also includes logistics and distribution. Moreover, the program contributes to Essity's sustainability target relating to the reduction of carbon emissions in line with the Science Based Targets initiative.

NOTES

1 ACCOUNTING PRINCIPLES

This year-end report has been prepared in accordance with IAS 34 and recommendation RFR 1 of the Swedish Financial Reporting Board (RFR), and with regards to the Parent Company, RFR 2.

Effective January 1, 2020, Essity applies the following amended International Financial Reporting Standards (IFRS):

IFRS 9 Financial Instruments and IFRS 7 Financial Instruments

All other applied accounting principles and calculation methods correspond to those presented in Essity Aktiebolag's (publ) Annual and Sustainability Report for 2019.

IFRS 9 Financial Instruments and IFRS 7 Financial Instruments

Amendments to IFRS 9 and IFRS 7 were adopted on January 15, 2020 as a result of the reference rate reform. The amendments provide temporary exceptions from the application of specific requirements for hedge accounting for hedging relationships that are directly impacted by this reform. The exceptions apply to hedge accounting with the purpose being that companies should not have to discontinue hedging relationships due to uncertainty concerning the reform. The amendments are to be applied as of January 1, 2020 with early application permitted. Essity has elected not to apply these amendments prospectively. At present, the reform primarily impacts Essity's hedging of fair value and EUR LIBOR interest rates. However, these hedges are expected to remain effective in the future. The introduction of the new regulations is therefore not expected to have any material impact on Essity's financial statements.

The assessment is that the above changes will not have any material effect on the Group's or the Parent Company's earnings or financial position.

2 RISKS AND UNCERTAINTIES

Essity's risk exposure and risk management are described on pages 34–39 of the 2019 Annual Report for Essity. No significant changes have taken place that have affected the reported risks.

Risks in conjunction with company acquisitions are analyzed in the due diligence processes that Essity carries out prior to all acquisitions. In cases where acquisitions have been carried out that may affect the assessment of Essity's risk exposure, these are described under the heading "Events during the quarter" in the interim and year-end reports.

COVID-19 pandemic

Uncertainty and risks have arisen on account of the COVID-19 pandemic that may affect Essity's sales, earnings and financial position.

Processes for risk management

Essity's Board of Directors determines the Group's strategic direction based on recommendations from the Executive Management Team. Responsibility for the long-term, overall management of strategic risks corresponds to the company's delegation structure, from the Board of Directors to the CEO and from the CEO to the business unit presidents. This means that most operational risks are managed by Essity's business units at the local level, but that they are coordinated when considered necessary. The tools used in this coordination consist primarily of the business units' regular reporting and the annual strategy process, where risks and risk management are a part of the process.

Essity's financial risk management is centralized, as is the Group's internal bank for the Group companies' financial transactions and management of the Group's energy risks. Financial risks are managed in accordance with the Group's finance policy, which is adopted by Essity's Board of Directors and which – together with Essity's energy risk policy – makes up a framework for risk management. Risks are aggregated and monitored on a regular basis to ensure compliance with these guidelines. Essity has also centralized other risk management.

Essity has a staff function for internal audit, which monitors compliance in the organization with the Group's policies.

4 Acquisitions and divestments

On February 27, 2020, it was announced that an agreement had been signed to acquire 75% of the Swedish medical solutions company ABIGO Medical AB. ABIGO Medical AB develops, manufactures and markets products including the Sorbact® technology, which is a clinically established innovation for advanced wound care. The transaction, which was subject to the customary regulatory approvals, was finalized on April 30, 2020.

A preliminary allocation of the purchase consideration is presented below, specifying intangible assets in the form of customer relationships, brands, technology and goodwill. The preliminary allocation may be adjusted. Goodwill is justified since ABIGO Medical AB was already an important partner and supplier to Essity prior to the acquisition, with Essity already using Sorbact® in its wound care products to prevent and treat infections. The company has about 170 employees and net sales in 2019 amounted to SEK 403m.

Since the acquisition, ABIGO Medical AB's recognized net sales amounted to SEK 163m, adjusted EBITDA to SEK 6m and adjusted EBITA to SEK -3m.

If the acquisition had been consolidated as of January 1, 2020, the anticipated sales would have amounted to SEK 272m, adjusted EBITDA to SEK 15m and adjusted EBITA to SEK 3m.

On April 1, 2020, Essity acquired 100% of the shares in Novioscan B.V., a Dutch company that develops a wearable ultrasound technology that monitors the bladder and enables continence control. The purchase price for the shares was EUR 4m and the takeover of net debt was EUR 3m. The company has ten employees. Net sales for 2019 and for the second quarter of 2020 were negligible in relation to those of the Essity Group. The purchase price allocation indicated goodwill of SEK 71m.

5 Use of non-IFRS performance measures

Guidelines for Alternative Performance Measures (APMs) for companies with securities listed on a regulated market in the EU have been issued by the European Securities and Markets Authority (ESMA). These guidelines are to be applied for APMs not supported under IFRS.

This interim report refers to a number of performance measures not defined in IFRS. These performance measures are used to help investors, management and other stakeholders analyze the company's operations. These non-IFRS measures may differ from similarly titled measures among other companies. Essity's 2019 Annual Report (pages 64–69) describes the various non-IFRS performance measures that are used as a complement to the financial information presented in accordance with IFRS. Tables are presented below that show how the performance measures have been calculated.

Science Based Targets

Essity's targets to reduce greenhouse gas emissions were approved by the Science Based Targets initiative in 2018. In terms of energy consumption within the company and purchased electricity (Scope 1 and 2), Essity has undertaken to reduce greenhouse gas emission by 25% by 2030 with 2016 as the baseline. The outcome for 2020 was –11% for Scope 1 and 2. Essity has, moreover, undertaken to reduce greenhouse gas emissions from the most important purchased raw materials, transport, waste arising from operations, and end-of-life treatment of sold products (Scope 3) by 18% by 2030 with 2016 as the baseline. The outcome for 2019 was –4% for Scope 3. Emissions are calculated using data from the company's value chain and Essity therefore presents data with a delay of one year. The targets and outcomes apply to wholly owned companies.
